Breadth of applications

Galaxy spans genomics, transcriptomics, proteomics, metabolomics, single cell, variant analysis, genome assembly, epigenetics, metagenomics, microbiome, machine learning, imaging, climate science, ecology, evolution, computational chemistry, materials science, synthetic biology, FAIR data, and One Health.

Funding

Lab continuously funded since 2006 by NIH and NSF. Active grants:

- **Galaxy** (U24HG006620) – \$21.5M, NIH/NHGRI, 2012–2026
- **AnVIL** (U24HG010263) – \$19.2M, NIH/NHGRI, 2018–2028
- **BRC-Analytics** (U24AI183870) – \$3.3M, NIH/NIAID, 2024–2029
- **Cancer Genomics** (U24CA284167) – \$4.2M, NIH/NCI, 2024–2029
- **Biodiversity/VGP** (2419522) – \$3.0M, NSF, 2024–2028
- **Phylogenetics** (R01GM151683) – \$0.5M, NIH/NIGMS, 2024–2029

Tool ecosystem

Galaxy tool wrappers	10,676
BioConda packages	11,699
BioContainers	12,333
CondaForge packages	30,722

All free, open-source, and containerized for reproducibility.

Global infrastructure

The **usegalaxy.*** consortium provides free public servers:

- **usegalaxy.org** – USA (ACCESS-CI)
- **usegalaxy.eu** – Europe (de.NBI / ELIXIR)
- **usegalaxy.org.au** – Australia (BioCommons)

Every user: 250 GB storage, 1 TB scratch, 8 concurrent jobs – free.

Galaxy Training Network

The world's largest open bioinformatics training resource:

- **489 tutorials** across 35 topics
- **214 training videos, 499 contributors**
- Galaxy Training Academy 2025: **3,700+ simultaneous participants**
- Annual Galaxy Community Conference
- Peer-reviewed, community-driven, free and open

Major international initiatives

- **AnVIL** – NHGRI's genomic data science platform
- **BRC Analytics** – pathogen, host, and vector genomics
- **CFDE** – NIH Common Fund Data Ecosystem
- **VGP** – Vertebrate Genomes Project (600 assemblies)

The Galaxy ecosystem

IUC	10,676 community-curated tools
IWC	100s of curated, tested workflows
BioContainers	100,000+ containers
Planemo	Tool development SDK
Pulsar	Distributed job execution
TPV	Intelligent job routing
